Fix order (do these in sequence)

1. **Summary** — name role, years, stack/domain, one recent scope
2. **Top bullet of recent role** — artifact + collaborator (recruiter-askable noun)
3. **Per-bullet pass** — remove banned verbs (leveraged, spearheaded, drove)
4. **Anti-buzzword pass** — delete Tier 1 phrases
5. **Tone pass** — mix lengths, vary lead words
6. **Credibility pass** — flag invented metrics + scope inflation
